CCTV is not enough. It must not remain as 'fit and forget'. That's why we built COM-SUR - the world's *only* CCTV video footage *auditing*, *smart* backup, and *standardized intelligent reporting* software; the *three missing pieces* of CCTV. Just like Google was the missing piece of the internet, COM-SUR is the missing piece of CCTV.

COM-SUR is a force multiplier, a complete workflow. It enables people to gain optimal value from surveillance video, leading to a safer world. Its use cases range from an airport to a zoo (A to Z).

COM-SUR enables people to 'audit' 24 hours of their own CCTV video footage in minutes, reduces data size hugely, saves and searches relevant data for future use (institutional library), and offers a cost-effective disaster recovery mechanism (seamless integration with OneDrive, Google Drive, Dropbox etc.). It standardizes reporting in PowerPoint/Word/PDF, and delivers business intelligence from reports. COM-SUR does the hard work for people, including ease of sharing (Skype, E-mail etc.); all this with existing cameras/VMS/analytics (brand/type agnostic).

COM-SUR is a must-have tool for the Police/LEA/Defense establishments to carry out repetitive tasks efficiently and productively. For the police, COM-SUR helps in law and order management, investigations, forensics, crime prevention and prediction (AI/ML) *, facial recognition database enhancement*, traffic issues, prison and police station management, etc., while for defence forces, COM-SUR helps in minute analysis, dissemination, retention, and search of surveillance video related to intelligence gathering (UAVs/drones etc.).

COM-SUR helps people to 'unlock' the information that remains 'hidden' in cameras leading to:

1. Improved homeland security, crime, fraud, and loss prevention; and faster solving of crime.
2. Threat and Hazard risk identification/mitigation, improvement of ops. efficiency, processes, business continuity, root cause analysis, and total quality management efforts.
3. Improvement of employee performance, customer satisfaction and sales.
4. Enhancement of compliance, and health and safety issues.
5. Huge reduction of data size and inexpensive disaster recovery mechanisms.
6. Ease of investigation, forensics, debriefing, and gaining business intelligence.

COM-SUR empowers people to gain new jobs of CCTV video footage auditors, and to start new businesses of auditing video footage. This will lead to 'waking up' the millions of 'eyes' that are currently in 'sleep mode', leading to crowd sourced surveillance and community policing. CCTV, body-worn cameras, drones, etc. capture enormous amounts of rich visual information. Only auditing will help people gain actionable intelligence to take corrective and preventive action for continuous improvement (think Kaizen); in areas that are also beyond crime. For example, agriculture, climate, forests, etc.

"Cameras don't lie" - but how will you know unless you 'see' what the cameras 'saw'?
Make CCTV work for you; *the COM-SUR WAY!* Audit CCTV - why suffer? Get award-winning COM-SUR. Don't wait for things to go wrong!

Free for places of worship world-over. COM-SUR's CSR. Details are available on request.

* Integration with other technologies/other software is required.
