

CCTV is not enough. It must not remain as 'fit and forget'. That's why we built COM-SUR.

COM-SUR enables people to gain optimal value from surveillance video, leading to a safer world. Its use cases range from an airport to a zoo (A to Z).

COM-SUR is the missing piece of CCTV. It is the world's only CCTV video footage auditing, smart backup, and intelligent reporting software, that is a force multiplier; a complete workflow.

COM-SUR reduces data size hugely, saves and searches relevant data for future use (institutional library), and offers a cost-effective disaster recovery mechanism (seamless integration with OneDrive, Google Drive, Dropbox etc.). It enables people to 'audit' 24 hours of their own CCTV video footage in minutes, and standardizes reporting in PowerPoint/Word/PDF (it delivers business intelligence from reports). COM-SUR does the hard work, including ease of sharing (Skype, E-mail etc.); all this with existing cameras/VMS (brand/type agnostic).

COM-SUR is a must-have tool for the Police/LEA/Defence establishments to carry out repetitive tasks efficiently and productively. For the police, COM-SUR helps in law and order management, investigations, forensics, crime prevention and prediction (AI/ML) \*, facial recognition database enhancement\*, traffic issues, prison and police station management, etc.

COM-SUR helps people to unlock the information that remains hidden in cameras leading to:

1. Improved homeland security, crime, fraud, and loss prevention; and faster solving of crime.
2. Risk mitigation, improvement of ops. efficiency, processes, and business continuity efforts.
3. Improvement of employee performance, customer satisfaction and sales.
4. Enhancement of compliance, and health and safety issues.
5. Huge reduction of data size and inexpensive disaster recovery mechanisms.
6. Ease of investigation, forensics, debriefing, and gaining business intelligence.

COM-SUR empowers people to gain new jobs of CCTV video footage auditors and start new businesses of auditing video footage. This will lead to 'waking up' the millions of 'eyes' that are currently in 'sleep mode', leading to crowd sourced surveillance and community policing.

CCTV, body-worn, drones, etc. capture enormous amounts of rich visual information. Only auditing will help people gain actionable intelligence to take corrective and preventive action for continuous improvement; in areas that are also beyond crime. For example, agriculture, climate, forests, etc.

"Cameras don't lie" - but how will you know unless you 'see' what the cameras 'saw'? Make CCTV work for you; the COM-SUR way.

Audit CCTV - why suffer? Get award-winning COM-SUR. Don't wait for things to go wrong!

*Free for places of worship world-over. COM-SUR's CSR. Details are available on request.*

\* Integration with other technologies/other software is required.
